## Therapeutic Equivalence Ratings

Drug products the FDA considers therapeutically equivalent to other pharmaceutically equivalent products. These codes are published in FDA's Orange Book:	
<b>AA</b>	Products in conventional dosage forms not presenting bioequivalence problems
<b>AB</b>	Products meeting necessary bioequivalence requirements
<b>AB1</b>	Products meeting necessary bioequivalence requirements, assigned when more than one reference listed drug of the same strength has been designated under the same heading
<b>AB2</b>	Products meeting necessary bioequivalence requirements, assigned when more than one reference listed drug of the same strength has been designated under the same heading
<b>AB3</b>	Products meeting necessary bioequivalence requirements, assigned when more than one reference listed drug of the same strength has been designated under the same heading
<b>AB4</b>	Products meeting necessary bioequivalence requirements, assigned when more than one reference listed drug of the same strength has been designated under the same heading
<b>AN</b>	Solutions and powders for aerosolization
<b>AO</b>	Injectable oil solutions
<b>AP</b>	Injectable aqueous solutions and, in certain instances, intravenous non-aqueous solutions
<b>AT</b>	Topical products
<b>BD</b>	Products containing active ingredients with known bioequivalence problems and for which adequate studies have not been submitted to FDA demonstrating bioequivalence
